Kent Marine Sea Squirt

Product Description:
The Kent Marine Sea Squirt is a revolutionary new instrument with several unique features:
- Contracted length of 21" (53cm), extends to 35" (89cm) for deep tanks or hard-to-reach areas
- Graduated tube is marked at each milliliter to enable ease of measuring the exact amount of food or supplement being added to the aquarium
- Holds up to 10-ml of liquid
- May be used to deliver foods in suspension or liquid supplements, as desired
- Extendable prong at tip of Sea Squirt may be used to deliver meaty-foods to anemones, eels, and other organisms that must generally be fed by hand
- Made of durable polycarbonate and silicone
- May be completely disassembled for cleaning
