

Marc Weiss Coral Vital LSB

Â "Live Sand & Rock Booster"Â

- Energizes non-photosynthetic microflora and microfauna Â
- Activates the viability of debris consuming organismsÂ
- Synergistic biological acceleratorÂ
- Keeps pore structure of live sand and rock open

Product Description:

Coral Vital LSB is designed for the express purpose of relieving ion bound substrates within the sand of the aquarium. Once the elements within the aggregate substrates are free to move normally, natural bio-filtration is able to be reestablished. Consequently waste products from feeding and the normal by products of the aquariums living populations are broken down and redistributed via subspecies. The final degradation of waste is rendered harmless to the environment by natural development.

Â INGREDIENTS:

Vitamins: Vitamin A, Vitamin D3, Vitamin E

Trace Minerals: Calcium, Phosphorus, NaCl, Potassium, Magnesium, Sulfur, Iron, Cobalt, Copper, Manganese, Iodine, Selenium, Zinc, Fluorine

Derived from ferment of: Cyamopsis tetragonolobus, Ceratonia Siligua, Monocalcium Phosphate, DiCalcium Phosphate, Calcium carbonate, Magnesium Oxide, Potassium Sulfate, Iron Sulfate, Copper Sulfate, Cobalt Sulphate, Manganous Oxide, Sodium Selenite, Calcium Iodate, Ethylenediamine Dihydriodide, Zinc Sulfate, Cobalt Proteinat, Copper Proteinat, Zinc Proteinat, Manganese Proteinat, Selenium Yeast, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Niacin, Chloine Chloride, Riboflavin Supplement, Calcium Pantothenate, Thiamine Mononitrate, Pyridoxine Hydrochloride, Folic Acid, Menadione Sodium B, Sulfite Complex, Biotin, Vitamin B12 Supplement

Bio-catalysts: Cane molasses, Aloe Vera, Citric Acid

Inert Carriers: Gum Tragacanth, Gum Locust Bean, Crude Fiber Extract, Crude Protein

Available Size:Â 6 oz ,16 oz
