

## Seachem Flourish Excel

### Â Product Description:

Flourish Excel<sup>®</sup> is a source of bioavailable organic carbon. All plants require a source of carbon. This is typically obtained from CO<sub>2</sub>, but, may also be derived from simple organic compounds (such as photosynthetic intermediates). Therefore, one can derive a substantial benefit with the use of Flourish Excel<sup>®</sup> either alone or in conjunction with CO<sub>2</sub> injection. Flourish Excel<sup>®</sup> also has iron reducing properties which promote the ferrous state of iron (Fe+2), which is more easily utilized by plants than ferric iron (Fe+3). Flourish Excel<sup>®</sup> is an integral component of Seachem<sup>®</sup>'s plant products and is recommended for use with the entire Flourish<sup>®</sup> line as well as our Flourite<sup>®</sup> and Onyx Sand<sup>®</sup> substrates. Contains no phosphate or nitrate.

### Directions:

On initial use or after a major (>Â 40%) water change, use 1 capful (5 mL) for every 40 L (10 gallons\*). Thereafter use 1Â capful for every 200 L (50 gallons\*) daily or every other day. Dosing may be slowly increased in high-growth aquariums. For smaller dosing please note that each cap thread is approximately 1 mL.

**DO NOT OVERDOSE!**

Available Size: 100 ml, 250 ml, 500 ml, 2 L, 4 L, 20 L
