Seachem Fluorish Iron

Â Product Description:
Flourish Ironâ„¢ is a highly concentrated (10,000 mg/L) ferrous iron (Fe+2) gluconate supplement. It should be used in those cases where the iron requirements exceed that which can be delivered by Flourishâ„¢ at the recommended dose or signs of iron deficiency appear (such as short and slender stems or yellowing between veins.) Plants are able to much more easily derive a benefit from Flourish Ironâ„¢ than from EDTA-iron sources because all EDTA iron is in the ferric (Fe+3) state. Since plants require iron in the ferrous state, additional physiological energy must be expended in order to extract the ferric iron from EDTA-iron and then convert it to the ferrous form. Contains no phosphate or nitrate.Guaranteed AnalysisIron (Fe)1.0%1.0% Soluble Iron (Fe)Â

Derived from: Ferrous Gluconate

Directions:
Use 1 capful (5 mL) for each 200Â L (50 gallons*) or as required to maintain about 0.10Â mg/L iron. For smaller doses please note that each cap thread is about 1Â mL. Use MultiTest: Ironâ„¢ test kit to monitor iron concentrations. Use as needed to combat signs of iron deficiency (usually seen in new growth) which include: chlorosis (yellowing) of tissue between veins and short and slender stems.Available Sizes: 100 ml, 250 ml, 500 ml, 2 L, 4 L, 20 L
