

Dymax LS Series Skimmer

Product Description:

The DYMAX Protein Skimmer is a highly performance protein extractor. Itâ€™s powerful injection flow rate pumped into the reacting chamber, producing tremendous number of tiny bubbles. The foam collected by the skimmer are made up by protein and other organic compound. These organic waste must be removed before they turn into nitrate and nitrite. The fine bubbles produces by the skimmer also helps to increase oxygen dissolved and ORP (oxidation reduction potential) level. There are six sizes for the Sawtooth Blade Series

LS60

~ 150mm

H 680mm

Max.Cap.1500LLS30

~ 120mm

H 500mm

Max.Cap.800LLS50
