Kent Marine Micro Vert

Â Product Description:
Kent Micro Vert contains a nutritionally balanced diet for corals, sponges, anemones, gorgonians, feather dusters, clams and other fine filter feeders. It is rich in vitamins and natural minerals from spirulina and kelp. Other products have not been properly preserved and smelled rotten, or were preserved with harsh, non food grade chemicals that smell like medicated mouthwash. Who wants to put these products into their expensive and sensitive marine aquarium? Kent Microâ€¢Vert is properly preserved, with preservatives reserved for human food use. It has a long shelf life without refrigeration and will provide superior results, just smell the difference!Directions:
Shake well immediately before use, Important: Invertebrate foods should be used sparingly in a marine aquarium, to prevent loss of water quality! Add 1 to 3 drops per gallon of aquarium water, up to 3 times a week (this is equal to 1/2 to 1-1/2 teaspoons or capfuls in a 55 gallon aquarium) (Tip: Nitrite testing will warn of overdosing.) Target Method:
Individual animals may be targeted with this product and this is the most efficient method. It also causes less pollution in the aquarium. To do this, purchase a plastic syringe at any drug store. Fill the syringe with Kent Micro Vert Invertebrate food and dispense, as necessary where the product will flow over the animal. Do not touch the animal with the syringe. Do not contaminate this product with aquarium water by inserting syringe into this container!Available Sizes: 8 oz, 16 oz, 64 oz & 5 gallons
