Kent Marine Kalkwasser Mix

Â Product Description:
KALKWASSER MIX provides bio-available calcium for lush growth of purple, pink and green calcareous algaes, snails, hard tube worms and clams. Corals will open more and stay attached to their skeletons better, with regular use. Phosphate & nitrate free! Contains no gluconates, EDTA, or other organics to raise DOC levels, as many competing products do. This product is the original European Method that has never been equaled for calcium addition to a Reef System! It will provide long term results that no other supplement will! â€¢ It requires a little more work, but so does anything that is really worthwhile! KALKWASSER MIX can be used with Kent Marine Concentrated Liquid Calcium or TURBOâ€¢CALCIUM for maximum results. Strontium addition via use of Kent Marine Strontium & Molybdenum Supplement or TURBOâ€¢STRONTIUM is absolutely necessary, as well. Use of Coralâ€¢Vite, and Essential Elements are beneficial, as well.Directions:
For best results adjust system KH to 8 to 10 dKH with Superbuffer-dKH or Marine Aquarium pH â€¢ Buffer first. Add 1/8 minimum to 2 teaspoons maximum powder per gallon of fresh water for a stock solution â€¢ Let stand for several hours â€¢ Only mix enough to last a week â€¢ A white precipitate may form on the bottom of the container. Above this is the clear calcareous water which should be added to the tank SLOWLY â€¢ Use drip method or dosing pump to drip into system on a continual basis to replace all water lost to evaporation â€¢ Does not cause pH to rise significantly when added slowly, but measure pH regularly â€¢ Use Kent Marine Superbuffer-dKH to control pH and carbonate hardness â€¢ For best results use Kent Marine Strontium & Molybdenum Supplement also.Available Sizes: 100g, 225g, 400g
