

Prodibio Bioptim

BIOPTIM contains all the microelements needed for aquarium life (selected amino acids, enzymes, natural vitamins (including riboflavin) and a natural plant surface active agent enabling better membrane absorption by cells). It also provides trace elements.

BIOPTIM is a natural product that affects cellular bioactivators. It dynamises the cellular metabolism of most of the bacteria living in marine water aquariums and reinforces the biological reactions by increasing the number of bacteria and therefore optimising water quality.Â
