

## Ocean Nutrition - Nano Reef Coral Food

### NANO REEF CORAL FOOD Product Description:

The Nano Reef Coral Food is a micro-encapsulated formulated diet with added probiotic properties. The small particle size (from 0.03mm to 0.15mm) makes it an ideal diet for SPS and soft corals. High HUFA (Highly Unsaturated Fatty Acids) content and omega 3/omega 6 ratio. This food has ideal buoyancy and does not cloud the water. Take a small (50ml) container, fill it halfway with water from the tank, add one spoonful of the powder and stir until all clumps are dissolved. Spread evenly around the aquarium or target feed using a pipette. Use one spoonful per 120l tank size. For best results switch of or bypass protein skimmer during feeding time.

- Probiotic properties for the good health of your inverts.
- Microencapsulated diet resulting from cutting edge food process technology.
- Particle sizes from 0.03mm to 0.15mm.
- Ideal food for corals with small polyps and soft corals.
- Easy dispersing of the product in the water.

Ingredients: Marine proteins (tuna roe, fish meal, mussel, squid, fish solubles), fish oil, minerals, rice starch, vitamins (stabilized ascorbic acid (vitamin C), choline chloride, alpha-tocopherol acetate (vitamin E), pantothenic acid, pyridoxine (vitamin B6), thiamine (vitamin B1), niacin, riboflavin (vitamin B2), folic acid, retinol (vitamin A), cholecalciferol (vitamin D3), biotin, cyanocobalamin (vitamin B12), menadione sodium bisulfite (vitamin K3)), lecithin, yeast, probiotic bacteria (Bacillus sp.), soybean meal, carotenoid pigments and preservatives (ethoxyquin, BHT, BHA).

Available Sizes: 100g/4oz, Nano Reef Fish Food, jar of 15g/0.5oz
