

Ocean Nutrition - Giovanni's Starter

Giovanni's Starter Product Description:

Substrate fertilizer for new tanks. Ideal to prepare the substrate for the addition of plants, just as one would do for garden plants. Before adding the substrate, sprinkle the Starter powder on the bottom of the tank. It contains all the necessary elements to encourage growth and development of aquatic plants. After a few months, start using Giovanni's Fertil Caps. A complete jar (200g) is sufficient to treat the bottom of a tank with a surface of 60x40cm to 80x40cm.

- Ideal substrate conditioner for planted tanks.
- Contains all the elements necessary to facilitate proper growth and development of aquatic plants.
- Includes clay, natural marine algae extracts and growth promoting amino acids.
- Entirely natural product, free of nitrates or phosphates.
- Nutrients remain available to the plants for a long time.

Potassium (K), Magnesium (Mg), Sulphur (S), Calcium (Ca).

Available Sizes: 1026030, Starter, jar of 200gr
