

Kent Marine Zoe Marine

Â Product Description:

Kent Zoe is a superior vitamin complex for Marine Fish, Invertebrates, and desirable algae. (Zoe does not contain phosphates as most competing vitamin supplements do, and will not cause unsightly algae growth!) It contains aquaculture grade vitamins, meaning that they are still active after one year in your aquarium! It is unique because it also contains natural minerals from spirulina and kelp sources. Competing products are preserved with glycerin, which is an alcohol and requires 50% concentration to preserve. Zoe is properly preserved, using less than Â½% preservatives, yet has a 4 year shelf life with no refrigeration. Just smell the difference!Directions:

For wonderful results, sprinkle over or soak fish food in Zoe, as appropriate. Brine shrimp are particularly good at absorbing the Zoe overnight in the refrigerator. Add one teaspoon (capful) per 50 gallons tank capacity, directly to the aquarium, up to twice weekly to benefit invertebrates and algae. For caulerpa and calcareous algae success, also use Kent Super Iron Supplement with Manganese.Available Sizes: 4 oz, 8 oz, 64 oz & 5 gallon
