

Weiss Organics Coral Boost

Â "Brings new life to corals and allows them to flourish as they would in nature."Organically boosts the growth of coralline algaeHelps enhance the survival and growth of hard and soft coralsMaintains an ongoing cycle that continually breaks down organic wasteConditions water to return to its natural stateProduct Description: Coral BoostTM is 100% organic. It won't interfere with any other additives you use in your aquarium. With regular use, the corals in your aquarium will open up. Coral BoostTM will help with the regeneration of corals, aid in the reproduction process and assist with damaged corals. It will also stimulate the immune system of the animals which will discourage saltwater ich from sticking.

Plants can provide O2 for the tank but will also compete for available O2 and will excrete CO2 through normal metabolism. Coral BoostTM when added will provide a more efficient metabolism for both plants and animals. This efficiency will allow more available O2 "normalizing" the shared "habitat." CO2 toxicity is subsided with the use of Coral BoostTM through the degassing phenomena. What is not degassed is left as available carbon and O2 which is essential for metabolism. Light waves promote tank metabolism for both plants and animals. Artificial lighting is limited to its power source and output capability. The â€œlumensâ€• expelled from the artificial light need to penetrate the volume of water in order to be beneficial to the organisms. When Coral BoostTM is added to the tank, significantly improved â€œlumenâ€• penetration is achieved which provides an enhanced environment for the growth of fauna and flora. **INGREDIENTS:**

Vitamins: Ascorbic Acid, B-Complex, Beta- Carotene, Cyanocobalamine, Folic Acid, Histamine, Iodine, K, Methionine, Niacin, Pyridoxin, Retinol, Riboflavin, Thiamin, Tocopherol

Minerals: Ca, Cr, Cu, Fe, K, Mg, Na, P, S, Se, Si, Mn, Zn

Derived from ferment of: Alginate Gum, Allium Cepa (Onion), Aloe Barbadensis (Aloe Vera), Capsicum Annuum (Cayenne Pepper), Citric Acid, Citrus Molasses, Daucus-Carota (Carrot), Ipomoea Batatas (Sweet Potato), Laminariales-Fucales (Kelp), Lycopersicon (Tomato), Raphanus Sativus (Radish), Sea Vegetables, Solanum Melongena (Eggplant)
