Two Little Fishies NanoMag

NanoMagâ„¢ Two Little Fishies' NanoMag is an itsy-bitsy, lean, high-energy, window-cleaning apparatus. Its patent-pending design provides flexibility and a slender profile that slips safely between polyps and viewing windows. Itâ€™s got the umph needed for cleaning glass up to 3/8â€• thick. The NanoMag also glides across the curved surfaces of fish bowls, wiping off algal films with ease, and itâ€™s so much fun to use you just might have to take turns.
