## New Life Spectrum Thera A-Small Fish Formula

Product Description: Thera A' Formulas

â€Thera A' is a balanced diet packed with garlic (which contains allicin compounds) and especially suited to feeding durin periods of stress such as: quarantine of new fish; during disease recovery; and before and after netting and movement.

Garlic helps to optimise the immune system and protect against parasites. This all-natural food is particularly useful for fish in marine aquaria where chemical treatments might raise the risk of side-effects.

â€Thera A' is not a medication, and disease treatments should continue to be used as appropriate. our popular 1mm micro-granule, as well as 0.5mm micro-granules and larger pellets. Available Sizes: 75g, 140g
