Prodibio BioKit Reef

Â BIOKIT REEF combines all the Prodibio reef aquarium range in one box:
BIODIGEST is made up of natural nitrifying, nitrate reducing and facultative strains selected for their ability to convert ammonia into nitrites, nitrites into nitrates and nitrates into nitrogen.
BIOPTIM is a natural product that affects cellular bioactivators to accelerate the cellular metabolism of most of the bacteria that live in aquariums.
REEF BOOSTER is a complete nutrient supplement containing all the elements required by the invertebrates and for zooxanthellae carrying coral which need additional microplankton.
IODI+ supplies the hard corals in your aquarium with the iodine they need to grow and for colouration.
STRONTI+ provides all the strontium needed for optimum and healthy coral, clam and coralline algae growth.
