

Ocean Nutrition - Feeding Prong

Feeding ProngProduct Description:

The Feeding Prong is an excellent tool for close-up feeding of Lionfish, Stonefish, Groupers, Oscars and other predators. Simply skewer Lance Fish or Krill Superba with this "invisible" acrylic prong and use a "wiggle-action" to trigger the feeding response.

- This is an ideal tool to wean fish off live food.
- Best used for feeding carnivorous fish by attaching Lance Fish, Krill Superba, chunks of squid etc. for feeding of predators.

Available Sizes: 1025150, Feeding Prong, pack of 1 pieceÂ
