

Ocean Nutrition - Betta Spa

Betta Spa Product Description:

Available for the first time for the Betta hobbyist in an user-friendly format: wild almond leaf, and a lot more, in one easy formula. Clean, easy, complete and consistent. The wild almond leaf extract mimics natural condition for the Betta fish. Contains Yucca extract to bind ammonia (NH₃) in the water. Contains Calcium to activate the muscles and to develop strong bones, teeth and scales. Produced only with natural ingredients. Recommended doses: 5ml per 8l of water for normal applications. Use with every water change. In case of severe stress, symptoms the concentration can be doubled.

- The leaves contain humic acids and tannins and are known to have antibacterial properties.
- Ideal for conditioning the Betta, promotes spawning, activity and colors. Betta SPA is recommended for all fishes kept in small containers, especially during transportation.
- Lowers the pH of the water and neutralizes harmful chemicals. Adds essential trace elements to the water.
- Colors the water via natural tannins, lignins and fulvic acids.
- Will make bubble nests stickier.

Wild almond leaves extract (Terminalia Catappa), Sodium Chloride, Calcium Chloride, Yucca extract, Almond extract, preservatives.
